■ 1 × Data Logging Stick WiFi Quick User Manual

### Introduction

Inverter

Data Logging Stick WiFi is mainly used in Ginlong inverters to realize simple and quick access to Internet. Users can easily check device information by logging in the monitoring center (www.ginlongmonitoring.com). The communication topology is as shown below:

Inverter

#### Description of Symbols

#### **⋒NOTE**

"Note" indicates additional information in the document and provides emphasis and supplements to the main contents. It also provides optimized product use skills or tips to save your time.

- To ensure normal use of the device, before using the device, be sure that a. The connected wireless router can normally access to Internet;
- b. The communication address of the inverter is "01". The communication address of inverters can be set on the LCD of inverters.
- A WiFi-enabled mobile phone or a laptop computer are connected to this device for parameter setting.

## 1 Electrical Connection

Connect WiFi to the corresponding interface on the inverter. 5K inverter will be used as an example in this manual. Please perform relevant operations as indicated below:

Data Logging Stick WiFi Installation

Insert WiFi Stick into RS485/WiFi interface.
 Fasten the WiFi monitor.

### **■ NOTE**

The device must be kept away from large metal objects and electrical devices with strong magnetic fields, such as microwave oven, refrigerator, cordless phone, concrete wall, PV panel and metal wall, to ensure the communication quality. Communication quality may be affected in lightning storms.

## 2 Parameter Setting

## 2.1 Setting up WiFi connection with iphone

The WiFi will perform self-check for 30 seconds after power-up. Wait for 30 seconds and then set up wireless network connection to WiFi via a mobile phone, iPad or laptop computer with wireless network adapter or WiFi function. iPhone 4 mobile phone will be used as an example as follows.

### 2.2 Connection via WiFi with PC

# Notice: The setting hereinafter is operated with Windows XP for reference only. If other operating systems are used, please follow the corresponding

- please follow the corresponding procedures.

  1. Prepare a computer or device, e.g., tablet PC and
- smartphone, that enables WiFi.

  2. Obtain an IP address automatically

Wireless Network Connection Properties

... Obtain ann address addomatica

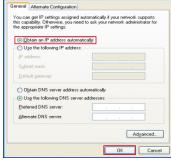

General Wireless Networks Advanced

Open Wireless Network Connection Properties double click Internet Protocol(TCP/IP).

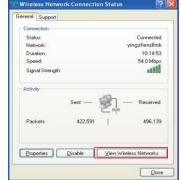

② Select Obtain an IP address automatically, and click OK.

ternet Protocol (TCP/IP) Properties

- 3. Set WiFi connection to the data logger
- Open wireless network connection and click View Wireless Networks.

② Select wireless network of the data logging module, no passwords required as default. The network name consists of AP and the serial number of the product. Then click Connect.

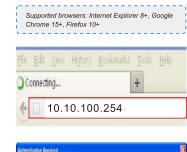

(3) Connection successful.

## 2.3 Set parameters of data logger

(a) Open a web browser, and enter 10.10.100.254, then fill in username and password, both of which are admin as default.

(b) In the configuration interface of data logger, you can view general information of the data logger.

Follow the setup wizard to start quick setting.

① Click Wizard to start.

♠ Device information

② Click Start to continue.

Dear user

Note: Before setting, please make sure that your wireless or cable network is working.

Start

2 3 4 5 6

4 Click Refresh to search available wireless networks, or add it manually.

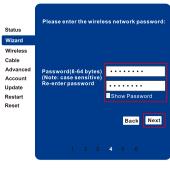

(5) Select the wireless network you need to connect, then click Next.

,\_\_\_\_\_, Notice: If the signal strength (RSSI) of the selected network is <10%, which means unstable connection. please adjust the antenna of the router, or use a repeater to enhance the signal. (\_\_\_\_\_

Please select your current wireless network:

 Enter the password for the selected network, then click Next.

(7) Select Enable to obtain an IP address automatically, then click Next.

(8) If setting is successful, the following page will display. Click OK to restart.

(9) If restart is successful, the following page will display.
